SUMMARY

Computer Science student at IIT Guwahati with an interest in Software Development and Data Analytics. Proficient in Python, JAVA, and JavaScript with experience in building scalable web applications, intelligent systems, and data-driven solutions. Delivering projects from real-time monitoring systems to comprehensive data analysis platforms.

TECHNICAL SKILLS

- **Programming Languages:** Python, JAVA (DSA), JavaScript
- **Web Technologies:** React.js, Node.js, Express.js, RESTful APIs, HTML, CSS
- **Database Systems:** MongoDB, MySQL
- **Cloud & DevOps:** AWS, Git, Github, Netlify, Postman
- **AI/ML & Data Analysis:** OpenCV, NumPy, Pandas, NLTK, TextBlob, Streamlit
- **Development Tools:** Git, Github, AWS

EDUCATION

Indian Institute of Information Technology, Guwahati

Bachelor of Technology, Computer Science & Engineering

Present

Guwahati, India

R.P.S. College Harnaut, Nalanda

Class XII: BSEB

May 2020

Bihar, India

COURSEWORK

- Data Structures
- Operating Systems
- Database Management Systems
- AI/ML
- Python Programming
- Computer Networks
- Data Analytics

WORK EXPERIENCE

AshwaQuant Pvt. Ltd.

May 2025 – July 2025

Web Developer Intern

Remote, India

- Built and deployed a fully responsive company website from scratch using React.js, aligned with branding and UI/UX best practices.
- Integrated Node.js backend with RESTful APIs to enable reliable contact forms, automated inquiry responses, and seamless client communication.
- Developed and managed detailed course pages (Algo Trading, Stock Market) with pricing setup and purchase workflow for easy customer access.
- Conducted requirement gathering, implemented design improvements, and executed continuous updates to ensure optimal performance, accuracy, and visual appeal.

RESPONSIBILITY

Core Member – Sponsorship & Event Operations, Yuvaan College Fest

- Negotiated and closed sponsorship deals worth 1.5 lakh by leveraging data-driven outreach strategies and maintaining stakeholder relationships.
- Planned and executed end-to-end logistics for 300+ attendees during the Bohagi cultural event, including resource allocation, scheduling, and real-time issue resolution.

PROJECTS

Melora - Music Recommendation System | Spring Boot, React.js, Spotify API, OAuth 2.0

Mar 2025

- Architected a full-stack recommendation engine using **Spring Boot** and **Spotify Web API**, enabling seamless bidirectional playlist synchronization between the application and user accounts.
- Implemented secure **OAuth 2.0** authentication flow to authorize third-party access and manage user sessions securely, ensuring data privacy.
- Developed a dynamic **React.js** frontend to visualize audio features and generate personalized playlists based on real-time listening history and acoustic preferences.

SnapEntry - Student Entry Exit Management System | React.js, Express.js, Netlify, JSON

Dec 2025

- Developed a Progressive Web App using React.js and Browser Local Storage, improving student entry/exit tracking efficiency.
- Implemented real-time authentication and QR-based check-ins, reducing manual record errors.
- Deployed on Netlify with Express.js REST APIs, handling over 1,000+ student records securely and enabling offline access.

EV Battery Health Management System | Python, Machine Learning, Random Forest, XGBoost

Sept 2024

- Designed a system to predict EV battery health using voltage, temperature, and charge cycle data to assess State of Health.
- Trained Random Forest and XGBoost models, achieving high accuracy in early battery issue detection.
- Prepared a detailed report explaining the process, results, and ways to improve the system in the future.
